

KEZIAH FERREIRA DOS SANTOS

Game & Tech Producer

SUMMARY

I am a kind and social person who always tries to see the best for my team or company. I always go in 100% and showcase loyalty.

I care about empathy and love helping others, solving problems, and never backing out from a challenge.

When I am not working, I like to cook, play video games, and have a big passion for playing music with my rock band. This also reflects my creative, social, and team-oriented personality. I value teamwork, trust, and a good working environment and always approach people with kindness and understanding.

EXPERIENCE

Game Producer

Star Stable Entertainment | Stockholm

2024 - Present

Game Producer for the content and feature team off twenty people.

As a Game Producer I was responsible for delivering weekly game updates in a live environment. Managed a cross-disciplinary team, connecting people and priorities across the team and wider organisation to keep development moving forward.

Managed day-to-day production, team rituals, balancing scope, priorities, stakeholder expectations, and team capacity while adapting plans based on risk assessments and as development evolved.

As a Game Producer I enjoyed most was taking ownership of content and features from concept to release, turning ideas into actionable plans, bringing the right disciplines together, navigating challenges along the way, and, last but not least, getting great experiences into players' hands.

Managed technical projects for Star Stable's Engine and Tools team, built on proprietary tech.

As a Game Producer I learned how to plan and define testing scope for projects involving graphical updates and optimisation, as well as how to conduct internal surveys to better understand the needs of our content creators and support them with better tools and updates.

Mail Carrier

Postnord | Stockholm

2017 - 2022

Organized and delivered mail and packages in Stockholm both for customers and companies. Trained six other new mail carriers.
